

Rafik Raafat Adel

Zaytoun • Cairo, Egypt • 01272187262 • rafikraafat14@gmail.com • [GitHub](#) • [LinkedIn](#)

Education

Arab Open University

B.Sc. in Computer Science, majoring in Artificial Intelligence

Graduation date : 1/2027

Sahara International School

International General Certificate of Secondary Education (IGCSE).

Graduation date : 7/2021

Experience

Bareq (collaboration)

Cairo , Egypt

product engineer

05/2026 – 07/2026

- Built and shipped an MVP in 3 months with a 3-person team using React Native, Next.js, NestJS, and TypeScript
- Led the design and development of the product's core matching algorithm, and collaborated with my team across the app to build and ship a platform that connects employers and job seekers
- Owned features end-to-end — from data model and API design in supabase to the mobile front-end experience.

Venu

Junior App Developer

Cairo , Egypt

07/2023 – 09/2023

- Built and maintained features for a React-based venue-booking web platform (Webpack, SCSS/Tailwind CSS) serving a catalog of 20,000+ venues, improving UI performance and code maintainability.
- Integrated third-party services including the CometChat SDK and Facebook Pixel/Hotjar for conversion tracking and user behavior analytics.

Activities and personal projects

The guardian angel

Brand owner and Operations

Cairo, Egypt

02/2025 – 07/2026

- Invested in a local clothing brand with my friend to learn and grow our own personal project
- Optimized the operations of the product and factory management to a 240% higher efficiency in product output.
- Achieved a 23.5% increase in monthly revenue in one year and broke even at the end of the 15th month

Projects

AI-Powered Speech-to-Text System

Graduation Project | 2026

- Designed and built an on-device, real-time speech-to-text platform using Python, Faster-Whisper, PyTorch, and Streamlit .
- Engineered an MFCC and DCT feature extraction pipeline and built an attention-augmented BiLSTM classifier that achieved 100% test accuracy with a 2.7ms inference time.
- Integrated a 4-bit quantized LLM post-processing layer using Mistral-7B to correct homophones, grammatical errors, and domain-specific terminology .
- Developed a WCAG 2.1-compliant interactive interface supporting live microphone streaming, media file uploads, and YouTube URL audio extraction with customizable high-contrast display modes.
- Implemented strict privacy-by-design principles using local CUDA/CPU inference to ensure no persistent audio storage and eliminate cloud security risks.

Skills & courses

Technical:

- | | |
|----------------|-------------------|
| • Python | • SCSS |
| • SQL | • Tailwind CSS |
| • Java | • REST APIs |
| • C++ Next.js | • Git |
| • NestJS | • Postman |
| • PyTorch | • Supabase |
| • TensorFlow | • Database Design |
| • scikit-learn | • TypeScript |
| • NumPy | • HTML |
| • Pandas | • React |
| • Webpack | • React Native |

Courses:

- | | |
|--|---|
| • Udemy
modern HTML and CSS | • Stanford University course library (open source materials)
CS229 machine learning |
| • Freecodecamp
SQL, database structures, and engines | • Coursera
Support vector machines in Python |
| • Coursera
Getting started with Jira | |
